Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance of claims 1-14.

For independent claim 1 the prior art of record does not disclose or clearly suggest a method of automatically grading an article of a given type, in particular an article of a garment type, that is formed by assembling a plurality of pieces, said method comprising:

a plurality of geometrical grading regions, each of which contains one or more characteristic points of a piece of the reference article, and grading formulae associated with respective ones of the various regions, each grading formula making it possible, to determine a displacement to be applied to each characteristic point contained in said region for going from the base size to another size;

in combination with the remaining limitations of the claim.

Claims 2-8 recite limitations which, in combination with allowed claim 1, render the dependent claims allowable.

For independent claim 9 the prior art of record does not disclose or clearly suggest a method of creating a grading mask for automatically grading articles of a given type, in particular articles of a garment type, that are formed by assembling a plurality of pieces, said method comprising:

creating grading regions, each of the grading regions being defined by a geometrical zone of the plane and containing at least one characteristic point of the piece of the article; and associating each grading region with a grading formula making it possible, to determine a displacement to be applied to each characteristic point contained in said region for going from the base size to another size

in combination with the remaining limitations of the claim.

Claim 10 recites limitations which, in combination with allowed claim 9, render the dependent claims allowable.

For independent claim 11 the prior art of record does not disclose or clearly suggest a grading mask for automatically grading articles of a given type, in particular articles of the garment type, that are formed by assembling a plurality of pieces, said mask comprising a plurality of geometrical grading regions, each of which contains one or more characteristic points of the piece of the reference article, and grading formulae associated with respective ones of the various regions, each grading formula making it possible, to determine a displacement to be applied to each characteristic point contained in said region for going from the base size to another size

in combination with the remaining limitations of the claim.

Claims 12-14 recite limitations which, in combination with allowed claim 11, render the dependent claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
